  - *Spares & Accessories*
  - *2 x Scales*
- 
- 

## **MORITZ CUSTOM BUILT TOILET PAPER CONVERTING MACHINES**

### **Toilet Paper Rewinder**

The working area of the machine is 2,370 m.

It works with a 5Kw motor, a 5 Kw drive and requires 3 phase electrical wiring.

The rider roll, perforation roll, embosser and back stand belt are all pneumatically operated.

The machine can make 3+ logs of 500 sheets per minute.

The machine is operated by one person.

All parts are available in South-Africa.

If your paper is 19 grams you should make +/- 9 000 rolls of 500 sheets per ton.

The machine's weight is no more than 2 tons and with the core winder.

band saw and sealer a 3,5 to 4 ton truck will be sufficient to transport.

These machines can run all kinds of paper i.e. recycled, 1 ply virgin and 2 ply

as you can set the tension at the back and the front of the machine and this also allows you to stretch the paper in need.

This machine is a lifetime investment.

There is the normal wear and tear on the bearings and belts,

but if your maintenance on machine is done and your staff members use it properly, your investment will LAST a lifetime.

All the machines were built to be tough, with no unnecessary frills and with only the essential components you need, which can all be replaced and bought in South Africa.

### **Core Winder Specs**

This machine has only the necessary components.

Runs a 2 ply core.  
Runs all kinds of different GSM core paper  
Single phase electricity  
Low maintenance costs

### **Log Cutng Unit**

Band Saw with automated table.  
Semi-Automated - with peddle which moves table back and forth in need.  
Table cuts 400+ bales per 8.5 hour shifts.  
Sharpening system keeps blades sharp.  
Table operates with pneumatics.

### **Sealer**

A step down sealer  
Seals 1x plastic bag of 48's; 2x bag of 20's and 3x bag of 10's in need.
